🗄️ Mobile App Development - Project Timeline & Deliverables

Marketplace Platform - Vendor & Customer Matching

Project Timeline:

- **Phase 1:** Design Phase - 7 Days
- **Phase 2:** Development Phase - 1 Month & 15 Days (45 Days)
- **Phase 3:** App Store Submission & Approval - 15 Days
  Total Timeline: 67 Days
  Project Start Date: [To be confirmed]
  Design Phase Completion: [7 days after start]
  Development Start Date: [After design approval]
  Development Completion: [45 days after development starts]
  App Store Submission: [After development completion]
  Expected Live Date: [15 days after submission, subject to store policies]

Weekly Updates: Every Sunday evening, you will receive a progress update on the development.

📋 Executive Summary

This document outlines the complete development timeline and deliverables for your marketplace mobile application. The project includes a comprehensive vendor-customer matching platform with product listings, search functionality, direct contact features, subscription management, and admin panel.

Key Features:

- ✅ User Authentication & Registration (Vendor & Customer roles)
- ✅ Vendor Registration with Payment Integration
- ✅ Store Profile Management
- ✅ Product Listings & Management
- ✅ Advanced Search & Discovery (Location, Category, Price)
- ✅ Inquiry & Communication System
- ✅ In-App Real-Time Chat
- ✅ Direct Contact Integration (WhatsApp, Phone)
- ✅ Subscription Management (Basic & Premium plans)
- ✅ Admin Panel (Vendor Approval, Analytics, Moderation)
- ✅ Featured Vendors System
- ✅ Saved Products & Vendors

Total Screens: 48 Screens

Platform Model:

- ❌ No in-app payments for transactions (payments handled externally)
- ❌ No commission on transactions
- ✅ Platform revenue via registration fees & subscriptions
- ✅ Direct vendor-customer matching
- ✅ Order intent tracking

🎨 Phase 1: Design Finalization (7 Days)

This phase must be completed BEFORE development begins.

Days 1-7: UI/UX Design & Approval

Deliverables:

- Complete app screen designs (48 screens)
- Design system & style guide
- Color scheme & branding
- Iconography & illustrations
- User flow diagrams
- Interactive prototypes (if required)
- Separate designs for Vendor and Customer interfaces
- Admin panel designs

Client Responsibilities:

- Review and approve all screen designs
- Provide brand guidelines (colors, logos, fonts)
- Approve user flows and navigation structure
- Sign off on design mockups
- Confirm payment gateway preferences (Stripe/Paystack/Flutterwave)

Output:

- ✅ Approved design mockups for all 48 screens
- ✅ Design system documentation
- ✅ Ready for development handoff

Important: Development will begin only after design approval is complete. The 1 month & 15 days (45 days) development timeline starts counting from the day after design approval.

Note: App Store submission timeline (15 days) is an estimate and may extend depending on iOS App Store and Google Play Store review policies and requirements.

Phase 2: Development Timeline (1 Month & 15 Days / 45 Days)

Development starts after design phase completion.

Weekly Update Schedule: Every Sunday evening, we will share progress updates in the WhatsApp group covering:

- Screens completed during the week
- Features implemented
- Current status and next week's plan
- Any blockers or concerns

Week 1: Foundation & User Authentication (Days 1-7)

Duration: 7 Days

Screens to be Delivered:

1. **Splash Screen**
    - App logo and loading animation
    - Initial app entry point
2. **Onboarding/Welcome Screen**
    - App introduction slides
    - Role selection (Vendor/Customer)
    - Key features overview
3. **Login Screen**
    - Email/Phone and password login
    - Role toggle (Vendor/Customer)
    - "Forgot Password" option
    - "Sign Up" navigation
4. **Registration Screen**
    - Role selection (Vendor/Customer)
    - Email address input
    - Phone number input
    - Password input
    - Confirm password
    - Terms & conditions acceptance
    - Privacy policy acceptance
5. **OTP Verification Screen**
    - 6-digit OTP input
    - Resend OTP functionality
    - Timer countdown display
6. **Forgot Password Screen**
    - Email/Phone input
    - OTP verification
    - New password setup
7. **Home Screen**
    - Hero section with search bar
    - Featured vendors/products
    - Categories grid
    - Recent listings
    - Location selector
    - Bottom navigation bar

Week 1 Deliverables:

- ☑ Complete authentication system
- ☑ Role-based user registration and login flow
- ☑ Home screen with content display
- ☑ Navigation structure ready

Week 2: Vendor Registration & Store Setup (Days 8-14)

Duration: 7 Days

Screens to be Delivered:

8. **Vendor Registration Flow Screen**
    - Business information form
        - Business name
        - Business type
        - Location/Address
        - Contact details

- Registration fee display
- Payment integration
- Payment success/failure handling

9. **Vendor Registration Status Screen**
    - Pending approval status
    - Payment confirmation
    - Admin review message
10. **Store Profile Setup Screen**
    - Business name (editable)
    - Business description
    - Location (map picker)
    - Contact details
    - WhatsApp number
    - Phone number
    - Business hours
    - Profile image upload
    - Cover image upload
11. **Store Profile Preview Screen**
    - Public store view
    - Edit button
12. **Subscription Plans Screen**
    - Basic plan (limited listings)
    - Premium plan (more listings + featured)
    - Plan comparison
    - Current plan display
13. **Subscription Payment Screen**
    - Plan selection
    - Payment processing
    - Subscription confirmation
14. **Subscription Management Screen**
    - Current subscription details
    - Renewal date
    - Upgrade/Downgrade options
    - Subscription history
    - Cancel subscription option
15. **Vendor Dashboard Screen**
    - Store overview
    - Active listings count
    - Pending inquiries count
    - Subscription status
    - Quick actions
16. **Vendor Settings Screen**
    - Store settings
    - Notification preferences
    - Account settings
    - Subscription management

Week 2 Deliverables:

- ☑ Vendor registration with payment working
- ☑ Payment processing functional
- ☑ Store profile creation functional
- ☑ Admin approval workflow ready
- ☑ Subscription system working
- ☑ Plan-based listing limits enforced

Week 3: Product Listings & Search (Days 15-21)

Duration: 7 Days

Screens to be Delivered:

17. **Add Product Screen**
    - Product name
    - Category selection
    - Price input (display only)
    - Description (rich text)
    - Multiple images upload
    - Availability toggle
    - Location (auto from store or custom)
18. **Edit Product Screen**
    - Same as add product

    - Pre-filled with existing data

19. **Product List Screen** (Vendor view)
    - List of all vendor's products
    - Filter by status (Active, Inactive)
    - Search within products
    - Quick actions (Edit, Delete, Toggle availability)
20. **Product Detail Screen** (Vendor view)
    - Full product details
    - Edit button
    - Delete button
    - Availability toggle
    - View count
    - Inquiry count
21. **Product Search Screen**
    - Search bar with filters
    - Category filter
    - Location filter (radius)
    - Price range filter
    - Sort options (Price, Distance, Recent)
22. **Product List Screen** (Customer view)
    - Grid/List view toggle
    - Product cards
        - Image, name, price
        - Vendor name, location
        - Distance indicator
        - "Contact Seller" button
    - Infinite scroll / Pagination
    - Pull to refresh
23. **Product Detail Screen** (Customer view)
    - Product images carousel
    - Product name, price
    - Description
    - Vendor information card
        - Store name
        - Location
        - Contact buttons (WhatsApp, Call, Message)
    - "Contact Seller" button
    - "Save Product" button
    - Share product option
24. **Category Screen**
    - Category grid
    - Products by category
25. **Location-based Search Screen**
    - Map view with product markers
    - List view
    - Location picker
26. **Vendor Profile Screen** (Customer view)
    - Store header (cover image, logo)
    - Store name, description
    - Location, contact info
    - Business hours
    - Contact buttons (WhatsApp, Call, Message)
    - Vendor's products grid
    - "Save Vendor" button
27. **Vendor List Screen**
    - List of vendors
    - Filter by location, category
    - Featured vendors section
    - Search vendors

Week 3 Deliverables:

- ✅ Product creation functional
- ✅ Product search working
- ✅ Location-based search working
- ✅ Filters and sorting working
- ✅ Product detail view complete
- ✅ Vendor profiles viewable

Week 4: Contact & Communication (Days 22-28)

Duration: 7 Days

Screens to be Delivered:

28. **Contact Seller Screen**
    - Product context display
    - Inquiry message input
    - Customer contact info (pre-filled)
    - Send inquiry button
    - Alternative: Direct WhatsApp/Call buttons
29. **Inquiries List Screen** (Customer view)
    - Sent inquiries list
    - Status (Sent, Read, Replied)
    - Product context
    - Vendor info
30. **Inquiries List Screen** (Vendor view)
    - Received inquiries list
    - Filter by status
    - Product context
    - Customer info
    - Mark as read/replied
31. **Inquiry Detail Screen**
    - Full inquiry message
    - Product details
    - Customer/Vendor info
    - Reply option (if in-app chat)
    - Contact buttons
32. **Chat List Screen**
    - List of conversations
    - Unread message count
    - Last message preview
    - Product context (if from product inquiry)
33. **Chat Screen**
    - Message list
    - Message input
    - Send button
    - Product context card (if applicable)
    - Vendor/Customer info
    - Image sharing (optional)
    - Chat notifications

Week 4 Deliverables:

- ☑ Inquiry system functional
- ☑ Customers can send inquiries
- ☑ Vendors can view and manage inquiries
- ☑ In-app chat functional
- ☑ Real-time messaging working
- ☑ Chat notifications working
- ☑ WhatsApp integration working
- ☑ Phone call integration working

Week 5: Admin Panel & Subscriptions (Days 29-35)

Duration: 7 Days

Screens to be Delivered:

34. **Admin Dashboard Screen**
    - Overview statistics
        - Total vendors
        - Pending approvals
        - Active subscriptions
        - Total products
        - Total inquiries
    - Recent activity
    - Quick actions
35. **Vendor Approval Screen**
    - Pending vendors list
    - Vendor details view
    - Approve/Reject buttons
    - Rejection reason input

36. **Vendor Management Screen**
    - All vendors list
    - Filter by status, subscription
    - Search vendors
    - Vendor actions (Suspend, Feature, etc.)
37. **Content Moderation Screen**
    - Reported products/vendors
    - Flagged content
    - Review and take action
38. **Analytics Dashboard Screen**
    - User growth charts
    - Vendor growth charts
    - Product listings growth
    - Inquiry/contact statistics
    - Revenue charts
39. **Subscription Management Screen** (Admin)
    - Active subscriptions
    - Expiring subscriptions
    - Subscription revenue
    - Manage subscriptions
40. **Feature Vendor Screen** (Admin)
    - Select vendors to feature
    - Set feature duration
    - Pricing for featured placement

Week 5 Deliverables:

- ☑ Admin panel functional
- ☑ Vendor approval workflow complete
- ☑ Vendor management working
- ☑ Content moderation functional
- ☑ Analytics dashboard working
- ☑ Subscription management complete
- ☑ Featured vendors system working

Week 6: Polish, Testing & Launch Prep (Days 36-42)

Duration: 7 Days

Screens to be Delivered:

41. **Saved Products Screen**
    - List of saved products
    - Remove from saved
    - Quick contact options
42. **Saved Vendors Screen**
    - List of saved vendors
    - Remove from saved
43. **User Profile Screen**
    - Customer profile
        - Personal info
        - Saved products/vendors
        - Inquiry history
    - Vendor profile
        - Store info
        - Products
        - Inquiries
        - Subscription
44. **Edit Profile Screen**
    - Update personal info
    - Change password
    - Notification preferences
45. **Terms & Conditions Screen**
    - Display terms
    - Acceptance checkbox
46. **Privacy Policy Screen**
    - Display privacy policy
47. **Disclaimer Screen**

    - Platform disclaimer
    - No liability statement
    - External payment notice

48. **About Screen**
    - Platform information
    - Contact support

Week 6 Deliverables:

- ✅ Saved products/vendors working
- ✅ User profiles complete
- ✅ Profile management functional
- ✅ Legal pages complete
- ✅ All features tested
- ✅ Production deployment ready
- ✅ Documentation complete
- ✅ Ready for launch

Final Days: Testing & Polish (Days 43-45)

Duration: 3 Days

Deliverables:

- Final testing and bug fixes
- Performance optimization
- UI/UX polish
- Final quality assurance
- Security audit
- Load testing
- Cross-platform testing (iOS/Android)
- Payment flow testing
- Real-time chat testing

🚀 Phase 3: App Store Submission & Approval (Days 46-60)

Duration: 15 Days

This phase begins after development completion and includes app store submission process.

Days 46-48: App Store Preparation

Deliverables:

- App Store Connect setup (iOS)
- Google Play Console setup (Android)
- App store listing content
    - App name, description, keywords
    - Screenshots (all required sizes)
    - App icon (all required sizes)
    - Promotional graphics
    - Privacy policy URL
    - Support URL
- App metadata preparation
- Age rating questionnaire completion
- Content rating submission

Days 49-50: App Submission

Deliverables:

- iOS App Store submission
    - Build upload to App Store Connect
    - App Store listing completion
    - Submission for review
- Google Play Store submission
    - APK/AAB upload to Google Play Console
    - Store listing completion
    - Submission for review
- Submission confirmation

Days 51-60: Review & Approval Process

Deliverables:

- Monitor review status
- Respond to review feedback (if any)
- Address any rejection issues
- Resubmission (if required)
- Final approval and app goes live

Important Notes:

- ⚠ **Review Timeline:** App store review times vary and are subject to iOS App Store and Google Play Store policies
- ⚠ **iOS App Store:** Typically 24-48 hours for review, but can take up to 7 days or longer
- ⚠ **Google Play Store:** Typically 1-3 days for review, but can take up to 7 days or longer
- ⚠ **Rejections:** If app is rejected, additional time will be needed for fixes and resubmission
- ⚠ **Policy Changes:** Store policies may change, requiring additional compliance work
- ⚠ **Extended Timeline:** The 15-day estimate may extend based on:
    - Store review queue times
    - Rejection and resubmission cycles
    - Policy compliance requirements
    - Additional documentation requests

Client Responsibilities:

- Provide App Store Connect account access (iOS)
- Provide Google Play Console account access (Android)
- Review and approve app store listings
- Provide app store assets (screenshots, descriptions, etc.)
- Respond to any store-related queries

Week 7 Deliverables:

- ☑ App submitted to both stores
- ☑ Store listings complete
- ☑ App approved and live (subject to store policies)

Complete Screen Inventory

Total Screens: 48 Screens

Module	Screen Count
Authentication	6
Home & Navigation	1
Vendor Registration	4
Subscription	3
Vendor Dashboard	2
Product Management	4
Product Discovery	6
Vendor Discovery	2
Communication	6
Admin Panel	7
User Features	4
Legal & Info	4

Key Features & Functionality

1. User Authentication & Registration

- Secure user registration with email and phone
- Role-based registration (Vendor/Customer)
- OTP verification system
- Login and password management
- Role-based navigation

2. Vendor Registration & Payment

- Vendor registration with business information
- Registration fee payment integration (Stripe/Paystack/Flutterwave)
- Admin approval workflow
- Payment verification
- Registration status tracking

3. Store Profile Management

- Complete store profile setup
- Business information management
- Location with map integration
- Contact details (WhatsApp, Phone)
- Business hours
- Profile and cover image uploads

4. Subscription System

- Basic plan (limited listings)
- Premium plan (more listings + featured placement)
- Monthly/Yearly billing
- Subscription payment integration
- Plan-based listing limits
- Subscription management
- Renewal reminders

5. Product Listings

- Product creation with multiple images
- Product editing and management
- Category assignment
- Price display (no payment processing)
- Availability management
- Location-based product listing
- Product search and discovery

6. Advanced Search & Discovery

- Text search (name, description)
- Category filtering
- Location-based search (radius)
- Price range filtering
- Sorting (price, distance, date)
- Map view with product markers
- Vendor discovery

7. Inquiry & Communication System

- Product inquiry messages
- Inquiry status tracking
- Vendor inquiry management
- Customer inquiry history
- Order intent tracking

8. In-App Real-Time Chat

- Real-time messaging
- Conversation management
- Product context in chats
- Image sharing
- Push notifications
- Unread message tracking

9. Direct Contact Integration

- WhatsApp integration with pre-filled messages
- Phone call integration
- Contact tracking and analytics
- Multiple contact methods

10. Admin Panel

- Vendor approval/rejection
- Vendor management
- Content moderation
- Analytics dashboard
- Subscription management
- Featured vendor management
- Platform statistics

11. Featured Vendors

- Featured vendor selection
- Premium placement
- Home page featuring
- Search priority
- Feature duration management

12. Saved Products & Vendors

- Save/Unsave products
- Save/Unsave vendors
- Saved items management
- Quick access to saved items

Complete Project Timeline

Phase	Duration	Start Date	End Date	Status
Phase 1: Design Finalization	7 Days	[Project Start]	[Day 7]	⏳ Pending
Phase 2: Development Begins	-	[After Design Approval]	-	⏳ Pending
Week 1: Authentication	7 Days	[Day 1 of Dev]	[Day 7 of Dev]	⏳ Pending
Week 2: Vendor Registration	7 Days	[Day 8 of Dev]	[Day 14 of Dev]	⏳ Pending
Week 3: Product Listings	7 Days	[Day 15 of Dev]	[Day 21 of Dev]	⏳ Pending
Week 4: Communication	7 Days	[Day 22 of Dev]	[Day 28 of Dev]	⏳ Pending
Week 5: Admin Panel	7 Days	[Day 29 of Dev]	[Day 35 of Dev]	⏳ Pending
Week 6: Polish & Testing	7 Days	[Day 36 of Dev]	[Day 42 of Dev]	⏳ Pending
Final Days: Testing	3 Days	[Day 43 of Dev]	[Day 45 of Dev]	⏳ Pending
Phase 3: App Store Submission	-	[After Dev Completion]	-	⏳ Pending
App Store Preparation	3 Days	[Day 46]	[Day 48]	⏳ Pending
App Store Submission	2 Days	[Day 49]	[Day 50]	⏳ Pending
Review & Approval	10 Days	[Day 51]	[Day 60]	⏳ Pending

Total Project Duration	**67 Days**	[Project Start]	[60 Days After Dev Starts] ⏳ Pending

Note: The 1 month & 15 days (45 days) development timeline starts counting from the day after design approval is received.

Important: App Store submission timeline (15 days) is an estimate and may extend depending on:

- iOS App Store review policies and queue times (typically 24-48 hours, can take up to 7+ days)
- Google Play Store review policies and queue times (typically 1-3 days, can take up to 7+ days)
- App rejection and resubmission cycles
- Policy compliance requirements
- Additional documentation requests from stores

Weekly Updates: Progress reports will be shared in the WhatsApp group every Sunday evening during the development phase.

📧 Weekly Progress Updates

Update Schedule:

Every **Sunday evening**, you will receive a comprehensive progress update covering the week's work.

What's Included in Weekly Updates:

1. **Progress Summary**
    - Screens completed this week
    - Features implemented
    - Overall progress percentage
2. **Detailed Breakdown**
    - List of completed screens with status
    - Features that are now functional
    - Current development phase
3. **Next Week's Plan**
    - Screens to be developed next week
    - Features to be implemented
    - Expected milestones
4. **Visual Updates**
    - Screenshots of completed screens (if available)
    - Demo videos (if applicable)
5. **Status & Concerns**
    - Any blockers or challenges
    - Items requiring client input/approval
    - Timeline status

Update Timeline:

- **Week 1 Update:** Sunday (Day 7 of development) - Authentication & Home progress
- **Week 2 Update:** Sunday (Day 14 of development) - Vendor registration progress
- **Week 3 Update:** Sunday (Day 21 of development) - Product listings progress
- **Week 4 Update:** Sunday (Day 28 of development) - Communication progress
- **Week 5 Update:** Sunday (Day 35 of development) - Admin panel progress
- **Week 6 Update:** Sunday (Day 42 of development) - Polish & testing progress
- **Development Completion Update:** Day 45 - Development completion report
- **App Store Submission Update:** Day 50 - Submission status
- **Final Update:** Day 60 - App live status (subject to store approval)

Communication Channel:

Updates will be shared in the WhatsApp group every Sunday evening. You can also request additional updates or demos at any time.

☑ Milestones & Deliverables

Milestone 1: Design Approval (End of Day 7 - Design Phase)

- ☑ All 48 screen designs approved
- ☑ Design system finalized
- ☑ Ready for development handoff
- ☑ **Development timeline starts from next day**

Milestone 2: Authentication Complete (End of Week 1 - Day 7 of Development)

- ☑ User registration and login working
- ☑ Role-based access functional
- ☑ Home screen displaying content
- 📧 **Sunday Update:** Week 1 progress report sent

Milestone 3: Vendor Registration Live (End of Week 2 - Day 14 of Development)

- ☑ Vendor registration with payment working
- ☑ Store profile creation functional

- ✅ Subscription system active
- 📧 **Sunday Update:** Week 2 progress report sent

Milestone 4: Product Listings Active (End of Week 3 - Day 21 of Development)

- ✅ Product creation and management working
- ✅ Search and discovery functional
- ✅ Location-based search working
- 📧 **Sunday Update:** Week 3 progress report sent

Milestone 5: Communication System Live (End of Week 4 - Day 28 of Development)

- ✅ Inquiry system functional
- ✅ In-app chat working
- ✅ Direct contact integration complete
- 📧 **Sunday Update:** Week 4 progress report sent

Milestone 6: Admin Panel Complete (End of Week 5 - Day 35 of Development)

- ✅ Admin panel functional
- ✅ Vendor approval workflow complete
- ✅ Analytics dashboard working
- 📧 **Sunday Update:** Week 5 progress report sent

Milestone 7: MVP Complete (End of Week 6 - Day 42 of Development)

- ✅ All 48 screens functional
- ✅ All features working end-to-end
- ✅ App ready for testing
- ✅ Quality assurance completed

Milestone 8: Production Ready (End of Day 45)

- ✅ Final testing completed
- ✅ Production deployment ready
- ✅ Documentation complete
- ✅ Ready for app store submission

Milestone 9: App Store Submission (End of Day 50)

- ✅ App submitted to iOS App Store
- ✅ App submitted to Google Play Store
- ✅ Store listings complete
- 📧 **Submission Update:** App store submission status report

Milestone 10: App Live (End of Day 60)

- ✅ App approved by iOS App Store (subject to review)
- ✅ App approved by Google Play Store (subject to review)
- ✅ App available for download
- ⚠️ **Note:** Timeline may extend based on store review policies
- 📧 **Final Update:** App live status report

🔄 Review & Feedback Process

Design Phase (Days 1-7)

- Daily design reviews
- Client feedback incorporated within 24 hours
- Final approval required before development starts
- **Development will NOT begin until design is fully approved**

Development Phase (1 Month & 15 Days / 45 Days - Starts After Design Approval)

- **Weekly Progress Updates:** Every Sunday evening via WhatsApp group
- Weekly progress demos (if requested)
- Client feedback sessions
- Bug fixes and adjustments
- Final testing and approval

App Store Submission Phase (15 Days - Starts After Development Completion)

- **Submission Updates:** Regular updates on submission status
- Store review monitoring
- Response to store feedback/rejections
- Resubmission if required
- **Note:** Timeline may extend based on store review policies

Weekly Update Format (Every Sunday Evening):

- Screens completed this week
- Features implemented
- Current progress percentage
- Next week's planned work
- Any blockers or concerns
- Screenshots/demos (if applicable)

📱 Platform Support

- **Android:** Android 8.0+ (API level 26+)
- **iOS:** iOS 12.0+
- **Distribution:** App will be provided as installable APK/IPA files or through app stores

---

🔒 Security Features

- Secure authentication with JWT tokens
- Encrypted data transmission
- Role-based access control
- Payment gateway security (PCI compliance)
- Secure file uploads
- Input validation and sanitization
- SQL injection prevention
- XSS prevention

💰 Monetization Model

Revenue Streams:

1. **Vendor Registration Fee** - One-time payment for vendor registration
2. **Vendor Subscriptions**
    - Basic Plan: Limited listings
    - Premium Plan: More listings + featured placement
3. **Featured Vendor Placement** - Optional paid boost for vendors

No Commission Model:

- ❌ No commission on transactions
- ❌ No in-app payment processing for transactions
- ✅ Payments handled directly between vendors and customers
- ✅ Platform earns only through registration and subscriptions

---

⚖️ Legal & Compliance

Important Disclaimers:

1. **Transaction Disclaimer:**
    - "This platform connects buyers and sellers. Payments and deliveries are handled directly between parties."
2. **No Liability:**
    - "The platform is not responsible for transactions, disputes, or any issues arising from buyer-seller interactions."
3. **External Payments:**
    - "All payments are processed externally. The platform does not handle payment processing for transactions."

Required Legal Pages:

- Terms & Conditions
- Privacy Policy
- Disclaimer
- About/Contact

📈 Post-Launch Support

Included:

- 15 days of bug fixes
- Performance monitoring
- Basic maintenance
- Server monitoring

📞 Project Communication

Regular Updates:

- **Weekly Progress Reports:** Every Sunday evening via WhatsApp group
- Screen-by-screen completion updates
- Demo sessions for each milestone (upon request)
- Issue tracking and resolution
- Real-time communication via WhatsApp group

Weekly Update Schedule:

- **Week 1 Update:** Sunday (Day 7 of development)

- **Week 2 Update:** Sunday (Day 14 of development)
- **Week 3 Update:** Sunday (Day 21 of development)
- **Week 4 Update:** Sunday (Day 28 of development)
- **Week 5 Update:** Sunday (Day 35 of development)
- **Week 6 Update:** Sunday (Day 42 of development)
- **Development Completion Update:** Day 45 (Development completion)
- **App Store Submission Update:** Day 50 (Submission status)
- **Final Update:** Day 60 (App live status, subject to store approval)

Client Requirements:

- Timely feedback on designs (within 24-48 hours)
- Approval for each milestone
- Access to necessary resources (branding, content, etc.)
- Payment gateway account setup
- Test account setup (if required)
- **App Store Accounts:** App Store Connect (iOS) and Google Play Console (Android) account access before Phase 3
- **App Store Assets:** Screenshots, descriptions, promotional graphics for store listings
- Review weekly updates and provide feedback if needed

⚠ Important Notes

- **Design Phase:** Critical to complete within 7 days to avoid development delays
- **Feedback Timing:** Delayed feedback may impact timeline
- **Scope Changes:** Any scope changes may require timeline adjustment
- **Third-Party Dependencies:** Delays in third-party services (payment gateways, etc.) may affect timeline
- **Testing:** Comprehensive testing included in Week 6 and final days
- **Payment Integration:** Requires client's payment gateway account setup before Week 2
- **App Store Submission:**
    - ⚠ **iOS App Store:** Review typically takes 24-48 hours but can extend to 7+ days depending on queue and policies
    - ⚠ **Google Play Store:** Review typically takes 1-3 days but can extend to 7+ days depending on queue and policies
    - ⚠ **Rejections:** If app is rejected, additional time needed for fixes and resubmission (not included in 15-day estimate)
    - ⚠ **Policy Changes:** Store policies may change, requiring additional compliance work
    - ⚠ **Extended Timeline:** The 15-day estimate may extend based on store review policies, rejection cycles, and compliance requirements
    - ⚠ **Client Requirements:** App Store Connect and Google Play Console account access required before submission

---

🛠 Technical Stack

Frontend:

- React Native (latest stable)
- React Navigation v6
- Redux Toolkit / Context API
- React Native Elements / NativeBase
- Socket.io Client
- React Native Maps
- React Native Image Picker

Backend:

- Node.js / Express
- MongoDB / Mongoose
- JWT Authentication
- Socket.io (real-time chat)
- Multer + Cloudinary (file uploads)
- Stripe/Paystack/Flutterwave (payments)
- SendGrid/Twilio (email/SMS)

External Services:

- Cloudinary (image storage)
- Payment Gateway (Stripe/Paystack/Flutterwave)
- Email Service (SendGrid/Twilio)
- Google Maps API (location services)
- Firebase (push notifications - optional)
