📋 What We Need From You

Simple Checklist of Required Items

This document lists everything we need from you to build your mobile app. Don't worry if you don't understand the technical terms - we'll help you get everything set up!

🔑 1. BSCScan API Key (Required)

What is it?
A free API key to verify USDT transactions automatically.

What we need:

- ☐ BSCScan API Key

Where to get it:

1. Go to: https://bscscan.com/register
2. Create a free account
3. Go to: https://bscscan.com/myapikey
4. Click "Add" to create a new API key
5. Copy the API key and send it to us

Link: https://bscscan.com/myapikey

📧 2. Email Service (Required)

What is it?
A service to send OTP codes and notifications to users via email.

What we need:

- ☐ Email service account (choose one option below)

Option A: Gmail (Free & Easy)

- ☐ Gmail account email
- ☐ Gmail account password
- ☐ Enable "App Password" in Gmail settings

How to get Gmail App Password:

1. Go to: https://myaccount.google.com/security
2. Enable 2-Step Verification
3. Go to: https://myaccount.google.com/apppasswords
4. Create app password for "Mail"
5. Copy the 16-character password

Link: https://myaccount.google.com/apppasswords

Option B: SendGrid (Recommended for Business)

- ☐ SendGrid account
- ☐ SendGrid API Key

Where to get it:

1. Go to: https://signup.sendgrid.com/
2. Create free account (100 emails/day free)
3. Go to Settings → API Keys
4. Create new API key
5. Copy and send to us

Link: https://signup.sendgrid.com/

💰 3. MetaMask Wallet Address (Required)

What is it?
Your wallet address where users will send USDT deposits.

What we need:

- ☐ MetaMask wallet address (for receiving USDT)
- ☐ Network: Binance Smart Chain (BSC)

How to get it:

1. Install MetaMask: https://metamask.io/download/
2. Create or import wallet
3. Switch network to "Binance Smart Chain"
4. Copy your wallet address (starts with 0x...)
5. Send the address to us

Important: Make sure you have the private key/seed phrase saved securely. We will need access to verify transactions.

Link: https://metamask.io/download/

🗄️ 4. Database (Required)

What is it?
A place to store all user data, transactions, and app information.

What we need:

- ☐ Database account (we recommend MongoDB Atlas - it's free)

Where to get it:

1. Go to: https://www.mongodb.com/cloud/atlas/register
2. Create free account
3. Create a free cluster (M0 - Free tier)
4. Create database user (username & password)
5. Get connection string
6. Send us: Username, Password, and Connection String

Link: https://www.mongodb.com/cloud/atlas/register

Note: Free tier includes 512MB storage - enough to start!

💻 5. Server Hosting (Required)

What is it?
A server where the app backend will run.

What we need:

- ☐ Server hosting account (choose one)

Option A: DigitalOcean (Recommended - Easy)

- ☐ DigitalOcean account
- ☐ Create a Droplet (server)
- ☐ Send us: Server IP address and SSH access

Where to get it:

1. Go to: https://www.digitalocean.com/
2. Sign up (get $200 free credit)
3. Create Droplet → Choose Ubuntu
4. Minimum: $6/month plan (1GB RAM)
5. Send us the server details

Link: https://www.digitalocean.com/

Option B: AWS (If you already have account)

- ☐ AWS account
- ☐ EC2 instance created
- ☐ Access keys

Link: https://aws.amazon.com/

🌐 6. Domain Name (Optional but Recommended)

What is it?
A website address for your app API (like api.yourcompany.com)

What we need:

- [ ] Domain name (if you want custom domain)

Where to get it:

- GoDaddy: https://www.godaddy.com/
- Namecheap: https://www.namecheap.com/
- Google Domains: https://domains.google/

Note: If you don't have a domain, we can use a temporary URL for testing.

---

7. Branding & Logo (Required)

What we need:

- [ ] Company logo (high quality PNG or SVG file)
- [ ] Brand colors (if you have specific colors)
- [ ] App name
- [ ] App tagline/slogan (optional)

How to provide:

- Send logo files via email or file sharing
- Tell us your brand colors (or we'll suggest)
- Confirm the app name

No links needed - just send us the files!

---

8. Legal Documents (Required)

What we need:

- [ ] Terms & Conditions document
- [ ] Privacy Policy document
- [ ] Refund Policy (if applicable)

Where to get them:

- You can write them yourself
- Or use online generators:
  - TermsFeed: https://www.termsfeed.com/
  - Privacy Policy Generator: https://www.privacypolicygenerator.info/

Note: If you don't have these, we can provide templates, but you should review with a lawyer.

---

9. App Settings & Configuration

What we need from you:

- [ ] Withdrawal fee percentage (e.g., 5%)

- ☐ Minimum withdrawal amount
- ☐ Minimum bet amount for games
- ☐ Maximum bet amount for games
- ☐ Admin email address (for withdrawal approvals)

No links needed - just tell us your preferences!

📋 Quick Checklist Summary

Must Have Before We Start (Week 1):

- ☐ Email service (Gmail or SendGrid)
- ☐ Database (MongoDB Atlas)
- ☐ Logo and branding
- ☐ App name

Need During Week 1-2:

- ☐ BSCScan API key
- ☐ MetaMask wallet address
- ☐ Server hosting (DigitalOcean or AWS)

Can Provide Later (Week 3-4):

- ☐ Legal documents
- ☐ Domain name
